

Letter from the Inventor

Let me introduce myself: My name is AL Siamon. I am 80 years young.

Most of my family died relatively young from diseases, such as heart trouble, colitis, and cancer, which lead me to my life's work.

I have been working for more than 50 years to develop products for the betterment of humanity. During these past 4 years I have been doing research primarily in Africa and North America. My Africa work has been concentrated in the countries of Nigeria, Ivory Coast, and Liberia with doctors, hospitals and missionaries.

The results of my research conclusively show the human body can be healthy if given the opportunity. It is all about ridding your body of the acid build-up in the body. The medical science world knows that if your body is acidic you can and will most likely get sick. Yet it offers no drugs or viable solutions to quickly remove the acid. My research has proven conclusively that Balance 7 can and will rapidly bring the immune system to such a high degree of effectiveness to cause the body's release of toxin buildup, resulting in the eradication of diseases that have plagued man for so long.

Balance 7 does not kill anything. It does not kill viruses or bacteria, rather, triggers the immune system to do what God intended it to do. I have no reservations in describing Balance 7 as being synonymous with the words longevity and health. It is a blend of all-natural ingredients and has no known side effects. Balance 7 can and will change your life for the better.

Sincerely,

Al Siamon
